

Spartacus publishes the Gay Travel Index every year since 2012. The index measures the legal situation and living conditions for members of the queer community in the respective country.

There are currently 18 categories ranging from marriage for all to the death penalty for homosexuals. Countries are color-coded, with dark green representing the most liberal and queer-friendly countries – and red representing the most dangerous countries for persons belonging to sexual and/or gender minorities to visit and live in.

The index attempts to strike a balance between the rights of the local LGBTQIA+ community and the demands of queer vacationers. The safety of these people in the respective country as well as increasing the visibility of abuses are important to us. We are convinced that there are holidaymakers who choose countries where the community is an accepted and loved part of society. But there are also vacationers who consciously want to travel to a country in order to enter into a dialogue with the oppressed local queer community. The index is intended to offer both attitudes a valid evaluation basis for a decision.

HOW THE RATING SYSTEM WORKS

It has a negative impact on the rating of a county, if human rights are not observed nor guaranteed or even worse, violated. A zero rating as lowest rating is only awarded if a county is lacking in important but not elementary categories such as LGBTQIA+ marketing or anti-discrimination legislation. The weighing of the factors as well as the categories themselves are subject to constant editorial monitoring. Both can be modified if necessary, which we indicate clearly if it is done.

Countries in which the death sentences for homosexuals is enshrined in law but is no longer performed have received one negative point. If people are still executed in a country because of their homosexuality, the country has been given five negative points. We can thus assure that the countries concerned get their deserved place at the bottom of our ranking.

Countries in which islamic sharia law applies in parts (Indonesia / Aceh, Pakistan and Libya minus one point) or are applied (Nigeria minus three points) are a special case in this system.

The legal situation for queer people varies widely within the 50 federal US states. We have therefore decided in 2020 to publish the USA Index again and to examine each state individually.

For 15 years now, a culture war over liberalism has been intensifying in the USA. What began with anti-trans laws and campaigns culminated in tough censorship since Trump's first administration: In schools in more and more (Republican-governed) states in particular, it is forbidden to teach or even talk about sexual orientation or gender identity. We have therefore added the *censorship* rating category.

The *hate crime laws, gay and trans* panic defense* and *queer infrastructure* categories are tailored specifically for the USA. This is where differences between the individual countries manifest themselves

With *queer infrastructure* we have in addition to the category of LGBTQIA+

marketing created a balance to the presentation of the legal situation. Here we've taken a look at which states have more than one city with prides, queer establishments, and other events. This may put small states at a disadvantage, but it makes sense that even states with regressive and anti-queer legislation can have cities with great queer diversity and offerings.

Under the *hostility* heading, we mainly counted murders of members of the LGBTQIA+ community in the last year. Other physical or verbal assaults were weighted when the final score was inconclusive based on the number of murders. Incidents in which people were offended or being physically attacked is almost every-

where. This can also happen in states that have not received any negative points.
